

“ These are a few of my favorite things”

Property Address: 393 Chestnut Hill Rd., New Boston, NH

- 1. The kitchen! Plenty of storage, great for entertaining! Renovated in 2005 with quartz countertops.**
- 2. Three Season porch. We spend most of our time on this porch, its comfy in the summer, spring and fall. In the winter, we use it to store wood for the fireplace or to come in from the snow and get the wet clothing off.**
- 3. Great place for kids to grow up! We had two sons, ages 5 & 3 when we moved here in 1987. They spent hours looking for frogs, playing games, playing with the dogs, picking blueberries from the wild bushes that populate the area around the wetlands. Now, our grandchildren do the same.**
- 4. We have many garden areas around the property which we have had great joy in cultivating and taking care of during our time here. The original garden in the back yard has a very large rock at the edge of it, many a child and dog have gotten up on the rock, they all love it. A lot of perennials, especially tiger lilies. One apple tree that does produce apples. Get them before the deer do!**
- 5. We installed an irrigation system in 2000, you may wonder why it's one of my favorite things. Well, as the garden areas grew and the lawn getting larger too, we were tired of hauling hoses around the yard. We needed a consistent water supply to support all the plantings and its worked beautifully.**
- 6. The wildlife is amazing, we've seen moose several times, most recently last fall. We have some birds that come back year after year to nest. Of course, you will see other animals as well. Bear, deer, woodchucks, porcupines. When we had dogs, we didn't see as many animals and the backyard was fenced. The beavers occasionally try to dam up the class 6 road behind the house, the last few years has had minimal activity.**
- 7. The patio! Recently completed a couple of years ago, its a great place to sit and unwind, read, entertain.**
